Career Campus

Project Brief — From College to Career

Project Overview

Career Campus is a student-focused career guidance platform designed to help college students make informed career decisions and prepare for the transition from college to employment. The platform brings career exploration, skill development, practical projects, and industry insights together in one place. Instead of students having to search across multiple platforms, Career Campus provides a structured journey from understanding their skills to exploring suitable career opportunities.

Problem Statement

Many college students are unsure about which career path to choose and what skills they need to develop for their desired career. They may have difficulty understanding industry requirements, identifying skill gaps, finding relevant learning resources, and gaining practical experience. Career Campus addresses this problem by providing a clear and structured career-development experience.

Objectives

• Help students explore suitable career paths.
• Help students understand the skills required for different careers.
• Identify areas where students can improve their skills.
• Provide practical project recommendations for skill development.
• Provide learning resources aligned with career goals.
• Give students access to industry trends and insights.
• Create a simple and intuitive platform for planning their career journey.

Target Users

Primary users: College students and fresh graduates who are exploring career options or preparing for employment.

Main Website Features

1. Home — Introduces Career Campus and provides entry points into the career journey.

2. How It Works — Explains the platform's career-development process step by step.

3. Career Guide — Helps students explore career paths, understand required skills, identify skill gaps, and follow a career roadmap.

4. Projects & Resources — Provides recommended projects and learning resources to develop practical skills.

5. Industry Insights — Provides information about industries, in-demand skills, emerging career roles, and changing industry trends.

6. About — Explains the purpose, vision, and value of Career Campus.

7. Login / Get Started — Provides an entry point for students to begin using the platform and access the career journey.

User Flow

Home → **Get Started** → **Login/Sign Up** → **Career Journey**

Students can also navigate through:
Home → **How It Works** → **Career Guide** → **Projects & Resources** → **Industry Insights** → **About**

Design Approach

The website uses a modern, professional, student-friendly interface with deep navy blue, warm cream/off-white, muted gold accents, clear typography, card-based layouts, consistent navigation, responsive design, accessible text contrast, and simple interactions with clear calls-to-action. The design is intentionally clean and human-centered rather than visually overcrowded.

Technology / Development

Figma / Figma Make — UI design and prototyping
HTML — page structure
CSS — styling and responsive layout
JavaScript — interactions and navigation

Expected Outcome

Career Campus aims to provide students with a clearer, more structured, and practical path from college to career, helping them understand their options, identify the skills they need, build relevant projects, and stay aware of industry expectations.

One-line Project Description

> “Career Campus is a student-focused career guidance platform that helps students explore careers, identify skill gaps, build practical skills, and make informed career decisions.”
